Contents

Achermann P, Borbély AA: Simulation of daytime vigilance by the additive interaction of a homeostatic and a circadian process 115
Adelsberger-Mangan DM, Levy WB: The influence of limited presynaptic growth and synapse removal on adaptive synaptogenesis 461
Aertsen A → Hellwig B
Akay M, Akay YM, Cheng P, Szeto HH: Time-frequency analysis of the electrocortical activity during maturation using wavelet transform 169
Akay YM → Akay M
Anastasijevic R → Boskov M
Anastasijevic R → Boskov M
Apolloni B, Ronchini G: Dynamic sizing of multilayer perceptrons 49

Becker JD → Radons G
Bishop PO: Size constancy, depth constancy and vertical disparities: a further quantitative interpretation 37
Borbély AA → Achermann P
Borisyuk RM → Cymbalyuk GS
Borisyuk RM → Kazanovich YB
Boskov M, Jocic M, Jovanovic K, Ljubisavljevic M, Anastasijevic R: Membrane potential changes of skeletomotor neurons in response to random stretches of the triceps surae muscles in decerebrate cats 333
Boskov M, Jocic M, Jovanovic K, Ljubisavljevic M, Anastasijevic R: Spike discharges of skeletomotor neurons during random noise modulated transmembrane current stimulation and muscle stretch 341
Bove M, Massobrio G, Martinoia S, Grattarola M: Realistic simulations of neurons by means of an ad hoc modified version of SPICE 137
Bowns L, Morgan MJ: Facial features and axis of symmetry extracted using natural orientation information 186
Bradski G, Carpenter GA, Grossberg S: STORE working memory networks for storage and recall of arbitrary temporal sequences 469

Carmesin H-O, Schwegler H: Parallel versus sequential processing of relational stimulus structures 523
Carpenter GA → Bradski G
Chay TR → Fan Y-S
Cheng P → Akay M
Collins JJ, Richmond SA: Hard-wired central pattern generators for quadrupedal locomotion 375
Collins JJ, Stewart I: A group-theoretic approach to rings of coupled biological oscillators 95
Crago PE → Lan N
Cymbalyuk GS, Nikolaev EV, Borisyuk RM: In-phase and antiphase self-oscillations in a model of two electrically coupled pacemakers 153

Davis KA, Voigt HF: Neural modeling of the dorsal cochlear nucleus: cross-correlation analysis of short-duration toneburst responses 511
Dayhoff JE: Synchrony detection in neural assemblies 263
Delius JD → Siemann M
Deppisch H, Pawelzik K, Geisel T: Uncovering the synchronization dynamics from correlated neuronal activitiy quantifies assembly formation 387
Dijkstra TMH, Schöner G, Giese MA, Gielen CCAM: Frequency dependence of the action-perception cycle for postural control in a moving visual environment: relative phase dynamics 489
Dülfer B → Radons G

Escola H → Jobert M
Evans JD, Kember GC: Analytical solutions to the multicylinder somatic shunt cable model for passive neurones with differing dendritic electrical parameters 547

Fan Y-S, Chay TR: Generation of periodic and chaotic bursting in an excitable cell model 417
Fontoura Costa L da: Topographical maps of orientation specificity 537
Friedrich R → Jirsa VK
Fuentes U → Ritz R
Fukai T: Synchronization of neural activity is a promising mechanism of memory information processing in networks of columns 215

Gaillard P → Jobert M
Geisel T → Deppisch H
Georgopoulos AP → Lukashin AV
Geri GA → Gertner I
Gerstner W → Ritz R
Gertner I, Geri GA: Image representation using Hermite functions 147
Gielen CCAM → Dijkstra TMH
Giese MA → Dijkstra TMH
Grattarola M → Bove M
Green GGR → Wray J
Grossberg S → Bradski G
Gutman SR → Latash ML

Haken H → Jirsa VK
Haken H → Reimann D
Hannaford B → Shoemaker M
Hellwig B, Schütz A, Aertsen A: Synapses on axon collaterals of pyramidal cells are spaced at random intervals: a Golgi study in the mouse cerebral cortex 1
Hemmen JL van → Ritz R
Hoff B: A model of duration in normal and perturbed reaching movement 481

Jirsa VK, Friedrich R, Haken H, Kelso JAS: A theoretical model of phase transitions in the human brain 27
Jobert M, Escola H, Poiseau E, Gaillard P: Automatic analysis of sleep using two parameters based on principal component analysis of electroencephalography spectral data 197
Jocic M → Boskov M
Jovanovic K → Boskov M

Kazanovich YB, Borisyuk RM: Synchronization in a neural network of phase oscillators with the central element 177
Kelso JAS → Jirsa VK
Kember GC → Evans JP
Kirmse R → Kirmse W
Kirmse W, Kirmse R, Milev E: Visuomotor operation in transition from object fixation to prey shooting in chameleons 209
Krüger J → Radons G

Lan N, Crago PE: Optimal control of antagonistic muscle stiffness during voluntary movements 123
Latash ML: Reconstruction of equilibrium trajectories and joint stiffness patterns during single-joint voluntary movements under different instructions 441
Latash ML, Gutman SR: Abnormal motor patterns in the framework of the equilibrium-point hypothesis: a cause for dystonic movements? 87
Levy WB → Adelsberger-Mangan DM
Liu F, Yamaguchi Y, Shimizu H: Flexible vowel recognition by the generation of dynamic coherence in oscillator neural networks: speaker-independent vowel recognition 105
Ljubisavljevic M → Boskov M
Lukashin AV, Georgopoulos AP: Directional operations in the motor cortex modeled by a neural network of spiking neurons 79

Martinoia S → Bove M
Massobrio G → Bove M
Massone LLE: A neural-network system for control of eye movements: basic mechanisms 293

Mates J: A model of synchronization of motor acts to a stimulus sequence. I. Timing and error corrections. II. Stability analysis, error estimation and simulations 186
Miikkulainen R → Sirosh J
Milev E → Kirmse W
Morgan MJ → Bowns L

Nikolaev EV → Cymbalyuk GS

Parnas BR: Analysis of the response properties of a computationally efficient spike initiator model 319
Pawelzik K → Deppisch H
Pinkham RS → Stewart AL
Poiseau E → Jobert M

Radons G, Becker JD, Dülfer B, Krüger J: Analysis, classification, and coding of multielectrode spike trains with hidden Markov models 359
Redish AD, Touretzky DS: The reaching task: evidence for vector arithmetic in the motor system? 307
Regan MP: A method for calculating the spectral response of a hair cell to a pure tone 13
Reimann D, Haken H: Stereo vision by self-organization 17
Richmond SA → Collins JJ
Rinzel J → Rush ME
Ritz R, Gerstner W, Fuentes U, Hemmen JL van: A biologically motivated and analytically soluble model of collective oscillations in the cortex. II. Application to binding and pattern segmentation 349
Ronchini G → Apolloni B
Rush ME, Rinzel J: Analysis of bursting in a thalamic neuron model 281

Schöner G → Dijkstra TMH
Schütz A → Hellwig B
Schwegler H → Carmesin H-O
Shimizu H → Liu F
Shoemaker M, Hannaford B: A study and model of the role of the Renshaw cell in regulating the transient firing rate of the motoneuron 251
Siemann M, Delius JD: Processing of hierarchic stimulus structures has advantages in humans and animals 531
Singer Y, Tishby N: Dynamical encoding of cursive handwriting 227
Sirosh J, Miikkulainen R: Cooperative self-organization of afferent and lateral connections in cortical maps 65
Sobey PJ: Active navigation with a monocular robot 433
Srinivasan MV: An image-interpolation technique for the computation of optic flow and egomotion 401
Stewart AL, Pinkham RS: Space-variant models of visual acuity using self-adjoint integral operators 161
Stewart I → Collins JJ
Stolyarov MN → Volkov EI
Szeto HH → Akay M

Tanaka S: Numerical study of coding of the movement direction by a population in the motor cortex 503
Thau RS: Illuminant precompensation for texture discrimination using filters 239
Tishby N → Singer Y
Touretzky DS → Redish AD

Voigt HF → Davis KA
Volkov EI, Stolyarov MN: Temporal variability in a system of coupled mitotic timers 451

Wallenstein GV: Simulation of $GABA_B$-receptor-mediated K^+ current in thalamocortical relay neurons: tonic firing, bursting, and oscillations 271
Wray J, Green GGR: Calculation of the Volterra kernels of non-linear dynamic systems using an artificial neural network 187

Yamaguchi Y → Liu F
